

GreenSurgeTM Foliar

DESCRIPTION

GreenSurge Foliar is a foliar-applied liquid nutrient product designed to provide Magnesium (Mg) and Sulfur (S) that may be deficient in the soil or plant.

DIRECTIONS FOR USE

GreenSurge Foliar is compatible with a wide range of nutrient and pesticide solutions and may be applied as a tank mix solution. Since **GreenSurge Foliar** tends to lower the pH of the spray tank solution, exercise care in mixing with compounds requiring a high pH. A standard quart jar test is always recommended before tank mixing with other materials.

GreenSurge Foliar should be applied as a foliar spray. Spray in the late evening or night. Early morning is next best. DO NOT spray in the heat of the day. DO NOT spray when the plant is under moisture stress. DO NOT spray to the point of runoff. Use as fine of a spray mist as possible. Allow 3-4 hours after application before sprinkler irrigation to avoid washing off the product.

RATES & TIMING

Orchards & Vineyards	1-6 QUARTS PER ACRE	Apply in spring. Always use the higher rate with water volume greater than 50 gallons per acre.
Field, Row, Vegetable & Fruit Crops	1-4 QUARTS PER ACRE	Apply any time during growing season; repeat as needed.
