

# PhotoGreen<sup>®</sup> Soil

## DESCRIPTION

**PhotoGreen Soil** is a soil-applied liquid nutrient product that is designed to provide Iron (Fe) & other nutrients that may be deficient in the soil or plant.

## DIRECTIONS FOR USE

Tank mix compatibility is impacted by water quality which may vary by location. DO NOT tank mix with Calcium fertilizers unless agitation is available. When mixing **PhotoGreen Soil** with other materials, always establish compatibility using the standard quart jar method prior to tank mixing.

**PhotoGreen Soil** is compatible with **Zicron Soil**, **Copron Soil** and all other **FBSciences** products. DO NOT mix **PhotoGreen Soil** with other products containing phosphate in concentrated form without first adding water.

Best results will be obtained when applications are watered in. Inject with a drip or sprinkler irrigation system. May be sprayed under the drip line of the plants or knifed in prior to a sprinkler irrigation or surface irrigation. Apply enough water to move the product into the area of active rooting, but not excessive amounts that may leach the product below the root system. Use the higher label rates with surface and flood irrigation.

## RATES & TIMING

# PhotoGreen® Foliar

## DESCRIPTION

**PhotoGreen Foliar** is a foliar-applied liquid nutrient product that is designed to provide Iron (Fe) & other nutrients that may be deficient in the soil or plant.

## DIRECTIONS FOR USE

Tank mix compatibility is impacted by water quality which may vary by location. When mixing with phosphate fertilizers adjusting the pH of the final tank mix to 5.0 with citric acid will improve compatibility and improve uptake. When mixing **PhotoGreen Foliar** with other materials, always establish compatibility using the standard quart jar method prior to tank mixing.

**PhotoGreen Foliar** should be applied as a foliar spray. Spray in the late evening or early morning. DO NOT spray in the heat of the day or when plants are under moisture stress. DO NOT spray to the point of runoff. Use as fine a spray mist as possible with a volume that covers the foliage. Allow 3-4 hours after application before sprinkler irrigating to avoid washing the product off.

## RATES & TIMING

<b>Orchards &amp; Vineyards</b>	<b>1-6 QUARTS PER ACRE</b>	Apply in the early spring (depending on severity of symptoms). Always use the higher rate with water volume greater than 50 gallons per acre.
<b>Field, Row, Vegetable, Fruit &amp; Greenhouse Crops</b>	<b>1-4 QUARTS PER ACRE</b>	Apply any time during growing season; repeat as needed.
